Review Questions

System Analysis and Design

Single Choice Question

1. Which step does not belong to SDLC?
 - a. Marketing
 - b. System Designing
 - c. Coding
2. Which project is suitable for Waterfall model?
 - a. Game app
 - b. Mobile app
 - c. Critical hardware-related software
3. Which project is not suitable for Agile model?
 - a. Game app
 - b. Mobile app
 - c. Critical hardware-related software
4. What major is mostly likely to get the most benefit from this course?
 - a. Graphic Design
 - b. App Development
 - c. Computer Networking
5. Which answer is not true about Agile model?
 - a. Each developer works as individual
 - b. Always requires user input
 - c. Fast delivery for result
6. If you develop a mobile app, which methodology is wrong for that?
 - a. Waterfall
 - b. Rapid App Development
 - c. Agile
7. If you develop a web app, which methodology is wrong for that?
 - a. Waterfall
 - b. Rapid App Development
 - c. Agile
8. If you develop a car automated system, which methodology is correct for that?
 - a. Waterfall
 - b. Rapid App Development
 - c. Agile
9. Which symbol name belongs to Data Flow Diagram (DFD)?
 - a. Decision
 - b. Terminator
 - c. Process
10. Which symbol name belongs to Data Flow Diagram (DFD)?
 - a. Disk
 - b. Connector
 - c. Data Store
11. Which symbol name does not belong to Data Flow Diagram (DFD)?
 - a. Process
 - b. Decision
 - c. Data Store

12. Which symbol name does not belong to Data Flow Diagram (DFD)?
- Data Flow
 - Disk
 - Data Store
13. In DFD, what part of speech of a source/sink?
- Noun
 - Adjective
 - Verb
14. In DFD, what part of speech of a data flow?
- Noun
 - Adjective
 - Verb
15. In DFD, what part of speech of a process?
- Noun
 - Adjective
 - Verb
16. In DFD, what part of speech of data store?
- Noun
 - Adjective
 - Verb
17. In DFD, which symbol is suitable for a database table?
- Source
 - Process
 - Data Store
18. In DFD, if you want to store a cache, which symbol is suitable for that?
- Source
 - Process
 - Data Store
19. In DFD, if you want to store web session, which symbol is suitable for that?
- Source
 - Process
 - Data Store
20. In DFD, which symbol is used for a decision?
- Source/Sink
 - Data Store
 - Process
21. In DFD if a data flow meets a process, what will it do next?
- It stops right there
 - It continues to next one
 - It goes back
22. In DFD if a data flow meets a sink, what will it do next?
- It stops right there
 - It continues to next one
 - It goes back
23. In DFD if a data flow meets a data store, what will it do next?
- It stops right there
 - It continues to next one
 - It goes back

24. Which numeric order is correct for DFD Level 0?
- 1.0, 2.0, 3.0, 4.0
 - 1.0, 1.1, 1.2, 1.3
 - 0.1, 0.2, 0.3, 0.4
25. Which numeric order is correct for DFD Level 1?
- 1.0, 2.0, 3.0, 4.0
 - 2.1, 2.2, 2.3, 2.4
 - 1.0, 2.0, 2.1, 2.2
26. In DB, which characteristic does not belong to a primary key?
- Unique
 - Unchanged
 - Nullable
27. What is the main purpose of a foreign key?
- To make the data unique
 - To connect to a primary
 - To make it safe
28. In Chen's ERD, what "rectangle" symbol represents?
- Entity
 - Attribute
 - Relationship
29. In Chen's ERD, what "dotted ellipse" symbol represents?
- Atomic attribute
 - Multi-valued attribute
 - Derived attribute
30. In Chen's ERD, what "diamond" symbol represents?
- Entity
 - Attribute
 - Relationship
31. In Chen's ERD, what "double-line ellipse" symbol represents?
- Atomic attribute
 - Multi-valued attribute
 - Derived attribute

Questions

- List down all the methodologies used in system development.
- List down all symbols in DFD.
- List down 5 types of attribute.
- List down all the degrees of relationship in ERD.
- Compare between Waterfall and Agile methodologies.
- Compare the pros and cons of Waterfall methodology.
- Compare the pros and cons of Agile methodology.

Problems

- Draw DFD about creating a Google account.
- Draw DFD about login into Gmail.
- Draw DFD about creating a Telegram account.
- Draw DFD about creating a Facebook account.

5. Draw DFD about login into Instagram.
6. Draw a data flow diagram (DFD) to show how to transfer money in ACLEDA.
7. Draw a data flow diagram (DFD) to show how to transfer money in ABA.
